

# Stora Holms Traffic Training Center - a step in the right direction

**Stora Holms**  
Trafikövningsplats AB

## Stora Holms Traffic Training Center

Stora Holms Traffic Training Center is one of the largest traffic training centers in Sweden. The facility boasts with, among other things, one of Europe's largest skid-pads with an area of 9 000 m<sup>2</sup>.

Every year 11 500 student drivers perform their mandatory risk course here. We also give further education to 3000 people from, among others, the business world and public authorities. Many of whom are occupational drivers.

Stora Holms Traffic Training Center operates as a subsidiary to NTF Väst which is part of the nationwide traffic safety organisation NTF. Read more about NTF Väst at [www.ntf.se/vast](http://www.ntf.se/vast)

Stora Holms Traffic Training Center was used as the Volvo group's main testing track facility until 1974. For example the three-point seat belt was tested here.

### Our facilities offer

- Varying tracks for risk experiences and handling driving
- A modern vehicle park
- A well educated staff
- A safety exhibition with among other things a crash sledge, a roll-over simulator, and a crash weight scale
- Conference and class rooms
- Cafeteria and restaurant
- Garage, workshop and carwash

## Active Driving

We offer classes for drivers of regular automobiles as well as large trucks and busses.

The courses are suitable for many different professional categories: drivers of emergency service vehicles, distributional drivers and representatives to name a few. We gladly adjust our courses to suit our customers' different needs.

### Our range of courses

Here are some of the courses we offer which can be a part in the education.

Read more at [www.storaholm.com](http://www.storaholm.com).

- Skid driving
- Handling driving
- The vehicle's safety system
- Safety exhibition
- Truck roll-over simulator
- Minivan course
- Custom-made courses
- Check Ride
- Traffic safety policy
- "Go to" education

## Events

You can lease our facilities for specific events, for example, the launch of a new auto model, testing a vehicle, company or customer get-togethers or kickoffs.

Stora Holms Traffic Training Center is located close to the Göteborg City Airport in Säve and is less than an hours drive from Göteborgs Landvetter Airport. Even though the traffic training center is only a 15 minute drive from the Göteborg city center it is located in a rural environment with many beautiful trails that offer varied driving.

## Planning

How do the modern cars driving characteristics and safety systems work on different road surfaces?

### Do tests on:

- Our skid-pads
- Our handling pad
- Our different track systems

Anything from one small track to several track systems can be used. We have several conference and class rooms for your lecture or presentation. One of which is located in a traffic control tower.

A successful event consists of many details joined together to become one memorable occasion. Good food, presentations, driving and an opportunity to mingle for example. We have vast experience in providing service for Swedish as well as international visitors and adjust all of our events to suit our customers needs.
